Part 1 - Building the Foundation: Project Initiation and Planning

Target Organisations

Non-Profit Organisation & Retail Store:

1. Proposal 1: Angela's Hope for Tomorrow Foundation
2. Proposal 2: Angela Digital World Store

Research and Planning

2.1 Website Project Proposal

1. Organisation Overview:

The organisation name: Angela 's Hope Foundation.

The **Angela's Hope Foundation** is a non-governmental organization that seeks to enhance the welfare of children, youths, and their families through community development programs. The organization's operations revolve around socio-economic issues like poverty, lack of jobs, low levels of education and food scarcity. As an attempt to solve these problems, the organization encourages education, skills development, community development and other projects that will positively impact community welfare. These areas reflect social responsibility principles which involve contributing to community welfare through education, job creation, skill development, donation and community-based projects among others.

Brief History

Angela's Hope Foundation is formed with the intent of overcoming socio-economic difficulties of the less fortunate such as poverty, unemployment, lack of education, and hunger. This foundation strives to help with community development through education, food, mentoring of the youth, skill development, and outreach in the community.

This foundation takes its lead from other foundations such as Afrika Tikkun (Anon., n.d.) which is a South African organization formed in 1994 to alleviate the problem of poverty and inequality through education, healthcare, youth development, and skill development. Afrika Tikkun is a clear example of the positive change that can be achieved through partnership and investments in the communities. Angela's Hope Foundation seeks to empower the children, youth, and families through giving them opportunities for education, independence, and hope for the future.

With the involvement of volunteers, donors, businesses, organizations in the community, and educational institutions, the programs of this foundation would definitely be enhanced.

Mission Statement

The mission of **Angela's Hope Foundation** is to make a difference in the lives of children, youth, and families through educational programs, food assistance, mentoring programs, skill development activities, and community development initiatives.

Vision Statement

Vision Statement of **Angela's Hope Foundation** is building communities which are strong and sustainable, giving the children, youth, and their families an environment where they can make a difference.

Target Audience

The beneficiaries of the **Angela's Hope Foundation** are numerous and range from children and youths to families, volunteers, donors, sponsors, community partners, and educational institutions. While children and youths stand to gain from education, mentoring, and skill development, families would be able to enjoy community-based assistance. In addition, volunteers would be able to make use of their expertise and help out with time, while sponsors and donors could provide funding and other forms of assistance.

2. Website Goals and Objectives:

Website Goal

Purpose of the Website:

The major purpose of the website is to develop a professional and user-friendly platform that connects Angela's Hope Foundation with its beneficiaries, volunteers, donors, and other community partners. This will enable easy access to information, communication, volunteering, and fundraising.

Objectives

The website aims to:

1. **Increase Awareness** by offering information on the foundation and its programmes.
2. **Improve Communication** through contact information, inquiries, social media, and newsletters.
3. **Increase Volunteer involvement** via an online volunteer registration system.
4. **Support Fundraising** through online donation system.
5. **Improve Stakeholder involvement** by keeping them informed through news, events, and programmes.
6. **Enhance the foundation's online presence and accessibility** of services offered by the foundation.

Key Performance Indicators (KPIs)

Performance of the website will be evaluated through:

- **Website traffic** – visitor count and number of pages viewed.
- **Volunteer sign-ups** – number of sign-ups.
- **Donations** – number and value of donations.
- **Inquiries** – number of inquiries.
- **Newsletter's sign-ups** – number of newsletter subscribers.
- **User engagement** – engagements on programmes, events, and social media sites.

3. Currently Website Analysis

Strengths

Despite the fact that Angela's Hope Foundation currently does not have an official website, there are some strengths that can be used to foster its online presence. Firstly, the organization already engages in community-based programs like education, food aid, youth mentoring, skill development, and outreach programs. Secondly, the existing connections with volunteers, donors, local businesses, and education institutions will be helpful for future online operations as well as for the creation of relevant content.

Weaknesses

The first weakness in the foundation is the lack of an official website, which limits the ability of all stakeholders to obtain information about the organization. This will make it hard for volunteers to register, as well as for donors to have access to proper information about their donations. At the same time, beneficiaries and community partners may have problems in obtaining information on programs and activities.

Without an online platform, the foundation also misses out on many chances of increasing public awareness, reaching out to prospective supporters, promoting their programmes, and enhancing communication with stakeholders.

Improvement Proposed

These problems would be solved by the proposed website that would create a platform through which the foundation can work. Pages like Home, About Us, Community Programmes, News and Events, Gallery, register as a Volunteer, Donate, and Contact would play an important role here.

4. Proposed Website Features and functionality:

Angela's Hope Foundation website is meant to be an easily accessible platform that can enable people to find out more information on the organization and its various activities. Some of the important features and functions of the website include:

1. **Home page** - This page would provide introduction about Angela's Hope Foundation by means of its logo, slogan, information and a community-based image. Navigation links will also be there for the convenience of the visitors.
2. **About Us** - This page will contain information about the foundation, its history, its mission, its vision, and its purpose.
3. **Community Programmes** - There will be an opportunity for visitors to learn about programs like education, food assistance, youth mentoring, skill development, and outreach programs.
4. **Gallery** - In this section, photographs of the various activities and community programmes that the foundation undertakes will be displayed for visitors to see.
5. **News & Events** - The latest updates regarding the foundation's activities and events will be mentioned in this section.
6. **Volunteer Registration** - Those who are willing to volunteer for the foundation shall have the option to learn more about volunteering opportunities and register themselves.
7. **Donations** - The donations part of the website will contain information on how people can contribute to the foundation financially.
8. **Contact Us** - Visitors can have access to contact information about the foundation and use the available means of communication to reach out.
9. **Enquiries** - Through an enquiry form, visitors will be able to contact the foundation with any queries or requests.
10. **Responsive Navigation** - The navigation bar will contain links for the primary pages, and the responsiveness will enable the site to work well on all screen sizes.
11. **Call to Action Elements** - Actions like volunteering and donations will make sure that people become part of the activities of the foundation and its programs.

5. Design and User Experience:

Colour Scheme:

The site shall have a neat, responsive, and user-friendly design with colours green, white, and orange. Green symbolizes hope and sustainable growth, white stands for transparency and honesty, while orange conveys compassion and encouragement.

Typography:

1. **Font Choices:** The website is going to have Georgia font for headings and important labels while the Arial font will be used in the body of the text, contact information, navigation information, and footer of the site.
2. **Main Headings:** The headings will be in Georgia font, size 5, and they will serve to make the page titles stand out visually and be easily recognisable by visitors.
3. **Section Headings:** The main section headings will be Georgia font in size 4. This will make them visible without making them blend in with other parts of the content.
4. **Important Labels:** “Street Address,” “Postal Address,” “Community Office,” and “Contact Information” will be the labels that will be bold in Georgia font with size 3. This will help visitors pick out important information.
5. **Body Text:** Supporting information will be in Arial, font size 3. The neatness of Arial will make reading of addresses, description, telephone numbers, and other details easy.
6. **Footer Text:** The text in the footer will be done in Arial font, size 3, for the links and the copyright details. This will ensure consistency with the supporting texts on the website.
7. **Typography Hierarchy:** The website will be well structured in terms of hierarchy via fonts. This will be done using Georgia, which will offer emphasis to headings and important labels while Arial will keep the rest of the text clear and straightforward.

6. Technical Requirements:

The website will be created through the use of HTML5 (Mozilla Developer Network, n.d.), CSS3 (Mozilla Developer Network, n.d.), JavaScript (Mozilla Developer Network, n.d.) and Bootstrap 5 (Bootstrap, 2025), whereas the version control process will be carried out through GitHub (Github Inc, n.d.). The other technical requirements for the website include secure web hosting services, a.org.za domain name and SSL certificate.

Figure 1: Sharing community spirit

7. Timeline and Milestones:

1. Project Planning: 1 August 2026

Website requirements and project goals will be discussed, and the website's general structure will be formulated.

2. Content Preparation: 2 - 3 August 2026

Content for the About Us, Programmes, Gallery, News & Events, Contact Us, and Enquiries sections will be prepared.

3. Wireframe and Layout Design: 4 - 5 August 2026

Wireframes will be made to determine the positioning of navigation menus, headings, pictures, content, forms, and footers.

4. Website Development: 6 - 8 August 2026

HTML will be used to build the website pages, including navigation, images, links, forms, and necessary content.

5. Styling and Content: 9 - 10 August 2026

The typography, layouts, images, captions, colours, and other visual elements in the website will have a consistent arrangement.

6. Functionality Testing: 11 August 2026

Testing will take place to identify problems with navigation links, inquiry forms, contact information and other interactive features.

7. Corrections and Improvements: 12 August 2026

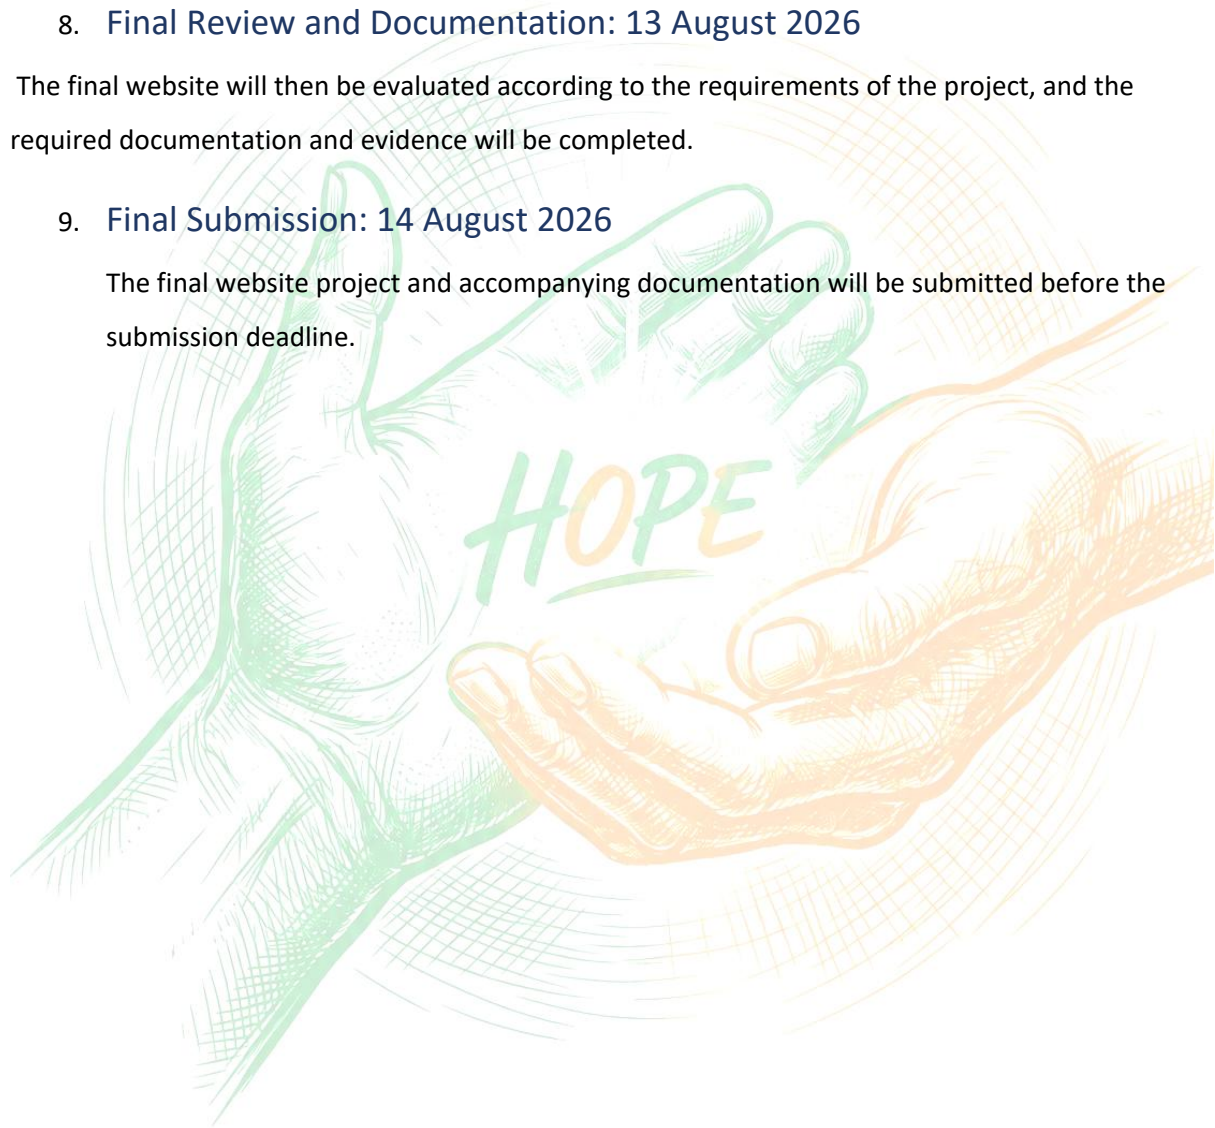

The mistakes made in testing will be sorted out, and the website will be made more user-friendly.

8. Final Review and Documentation: 13 August 2026

The final website will then be evaluated according to the requirements of the project, and the required documentation and evidence will be completed.

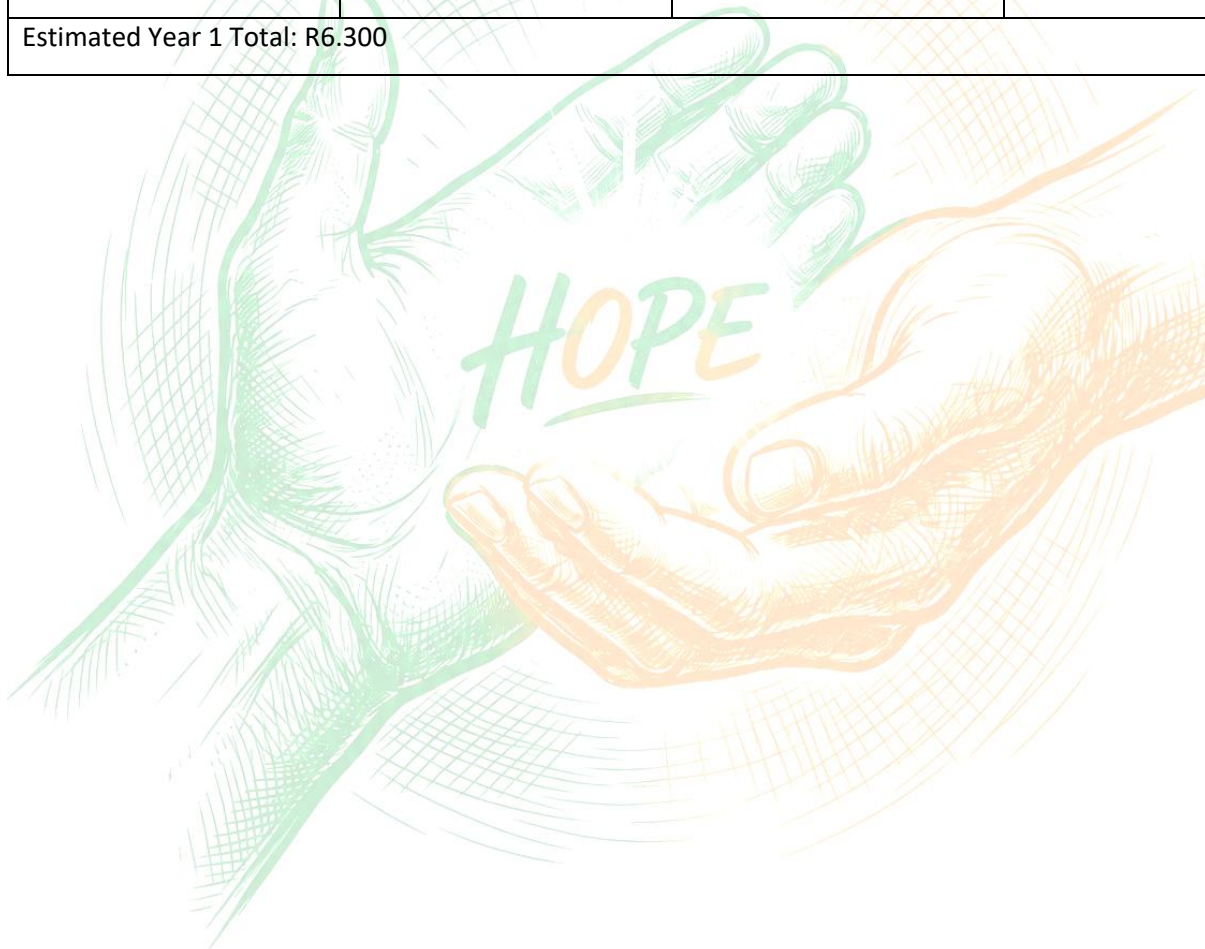

9. Final Submission: 14 August 2026

The final website project and accompanying documentation will be submitted before the submission deadline.

8. Budget:

Category	Estimated Cost	Frequency	Estimated Year 1 Cost
Website design and development	R0	Once-Off	R0
.co.za domain	R100	Annual	R100
Web hosting	R150/pm	Monthly	R1800
SSL certificate	R0	Annual	R0
Website maintenance	R300/pm	Monthly	R3600
Content updates	R200	As required	R800
Estimated Year 1 Total: R6.300			

Proposal 2: Angela Digital World Store

1. Organisation Overview:

The organisation's name: Angela Digital World Store

The **Angela Digital World Store** is a retail company that offers quality electronic devices, computer accessories, mobile devices, gaming devices, smart home appliances, and other types of digital products at competitive prices.

Brief History

Angela Digital World Store is an emerging retail business that specializes in supplying digital products to consumers. The firm was created in order to provide consumers with useful digital products through a convenient platform. Due to the changes in communication, education, work, and other aspects of life brought about by technology, it is important to provide solutions for the evolving needs.

As Angela Digital World Store grows in the future, it will be able to supply other kinds of products such as cell phones, computers, computer accessories, headphones, chargers, storage media, among others. Furthermore, it seeks to develop a strong relationship with its clients through quality products and good customer service.

The idea of Angela Digital World Store has been drawn from the success of South African e-commerce stores like Takealot (Takealot, n.d.), whose success proves how an e-commerce store can provide a variety of goods, a safe and secure way to shop online, fast delivery, and efficient customer services. The success of Takealot also underscores the growing need for convenient online shopping as well as the need for quality products together with an effective online shopping experience. Angela Digital World Store seeks to provide these same qualities.

Mission Statement

The objective of the company is to provide quality technological products and customer services to satisfy the needs of students, professionals, businesses, and general consumers with quality products that have excellent customer care and after-sales services. The mission statement is to offer affordable and reliable technology products with excellent customer services, while the vision statement is to become a reliable digital retailer in South Africa.

Vision Statement

The vision of Angela Digital World Store is to establish itself as a trustworthy retail store for digital and electronic products characterised by good-quality items, fair prices, and reliable customer

services. In the future, the vision of the retail store is to expand its business and introduce modern technology to more communities.

Target Audience

The primary target market of Angela Digital World Store is people who require low-cost yet efficient digital devices to use on a daily basis. Such people include students who may be searching for laptops or storage devices along with accessories, and professionals who may require devices that they can use while working.

However, Angela Digital World Store may also provide services to families, small businesses, and any other customers that may need electronic devices for communication, entertainment, learning, and business-related tasks.

2. Website Goals and Objectives:

The primary objective of the Angela's Digital Store website is the development of an easy-to-use website where the visitors would be able to browse through the products that are available in the store. Instead of making customers visit the store physically, they will be able to get familiar with the products and useful information via the website.

The website will aim to achieve the following objectives:

1. *Improve visibility on the web* - The website will ensure that there is increased visibility on the web for Angela's Digital Store.
2. *Promotion of digital products* - Digital products, such as laptops, smartphones, earphones, chargers, storage devices, and other accessories will be featured so that customers get to see what is available.
3. *Generation of customer queries* - Customers will be able to reach out to the store via the website to inquire about availability, pricing, and specifications of various products and services.
4. *Increase customer convenience* - The website will increase customer convenience as it will have all the relevant product information, contact information, and information about the store available online, which means that customers will not need to come into the store just to get some basic information.

5. *Increase sales* - The website will assist in increasing the number of sales made as it will organize the products in such a way that would prompt customers to make a purchase decision. In the future, an online ordering feature can be added.

6. *Create Customer Trust* - Providing clear business information, descriptions of the products offered, and contact information will help create a professional image of the online store.

All in all, the website will be much more than just a catalogue of products offered.

Key Performance Indicators (KPIs)

Some KPIs that will enable Angela's Digital Store to evaluate the success of its website include:

1. *Website Traffic* - Number of people visiting the website.
2. *Product Views* - Number of product views.
3. *Customer Inquiries* - Number of inquiries made.
4. *Conversion Rate* - The number of sales or inquiries made by customers divided by total website traffic.
5. *Online Sales* - Total sales made on the website.
6. *Customer Engagement* - Engagement with the website.
7. *Returning Customers* - The number of customers returning to the website.
8. *Customer Satisfaction* - Reviews by customers.

The above mentioned KPIs will allow Angela's Digital Store to determine whether its website is driving customers and contributing to business growth.

3. Analysis of current website

1. **Status of Current Website** - The website of Angela Digital Store is yet to be created, therefore there is no existing website to analyse here. Therefore, this analysis will centre on the aspects that the proposed website needs to incorporate right from the start.

2. **Potential Strengths** - In creating a new website, it will afford the business an opportunity to create an organised online identity. Products will be categorised while contact details will be made available in a place easy to see by customers.

3. **Potential Weaknesses** - Because the website is yet to be developed, there is no platform for customers to view products and make inquiries. Moreover, the business might lose out on potential clients who use the internet to look for digital and electronic products.

4. **Areas for Improvement** - These weaknesses need to be catered for in the proposed website.

4. Proposed Website Features and Functionality

1. **Home page** - The homepage will offer an introduction of the Angela Digital Store and selected products, promotions and useful information. Visitors will also receive a call-to-action that may lead them to product pages or the contact page.

2. **About Us Page** - This part of the website will offer some information regarding the purpose, mission and vision of the store.

3. **Products Page** - The customer will find information on digital and electronic products offered at the store, like laptops, smartphones, headphones, chargers and storage devices.

4. **Product Information** - It is also necessary that all products have some useful information attached to them including name, picture, description, specifications and price if any.

5. **Contact Us Page** - Customers will find contact information as well as an enquiry page regarding their queries about products and services.

6. **News and Promotions** - This will include new products, special offers and useful news for the customers.

7. **Gallery** - This gallery will showcase pictures of the products, the environment of the store and other useful images.

8. **Responsive Navigation** -The navigation of the website must be responsive and simple allowing the visitor to move around easily.

5. Design and User Experience:

1. **Colour Scheme** -Dark blue, white and light Gray with just a little bit of orange to emphasize buttons/highlights can be used as colour scheme for the website which will give it a modern look focused on technology with legible content.

2. **Typography** -The Aptos font can be used as the primary font because it is legible. The size of headings must be larger and bold compared to the body text.

3. **Layout/Design** -The website should have an organized layout with proper spaces between each section of the website. There must be product images with clearly highlighted buttons such as "View Products" and "Contact Us."

4. **Navigation** - A simple navigational menu should have essential pages such as Home, About Us, Products, Gallery, News & Events and Contact Us. Users should easily navigate through to the necessary content in a few clicks.

5. **Mobile Responsiveness** - The website must adapt to the various screen resolutions such that customers can view the available products comfortably from smartphones, tablets and PCs.

6. **Accessibility and Readability** - There should be enough contrast between text and background colour, images should include descriptive texts, and there should not be too much visual information on the web page.

7. **Low Fidelity Wireframes** - Before the website development commences, wireframes need to be developed indicating where the header, navigational menu, contents section, product cards, images, buttons and footer will be located.

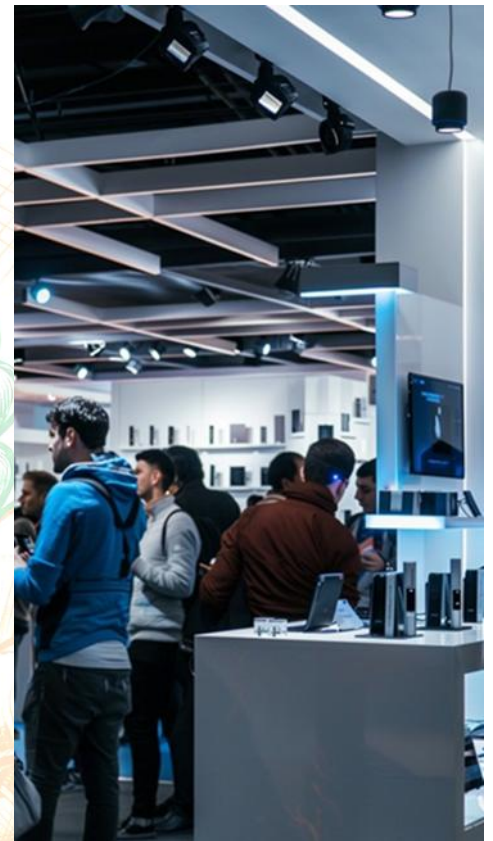

Figure 2 : Tech store buzz.

6. Technical Requirements:

1. **Domain Name** - A good domain name must be chosen, like angeladigitalstore.co.za (subject to availability). A .co.za domain will be good for a South Africa-based business.
2. **Web Hosting** - The website needs a web hosting service where the website files can be stored for the website to be made live on the internet. The hosting service must be chosen to suit the needs of a small digital store.
3. **HTML** - HTML5 will be used to design the web page content. These will include headings, paragraphs, images, navigation menus, forms and products section of the web pages. (Mozilla Developer Network, n.d.),
4. **CSS** - CSS3 will take care of the visual aspect of the website. These will include colours, fonts, spacing, positioning and buttons among other things. (Mozilla Developer Network, n.d.)
5. **JavaScript** - JavaScript may be used in the site for adding interactive features like form validation, picture galleries, navigation and other dynamic elements. (Mozilla Developer Network, n.d.)
6. **Responsive Design** - The site will employ responsive design technologies, like CSS Media Queries, for creating a layout that is compatible with desktops, tablets and mobile devices.
7. **Security and Maintenance** - Site updates, secure hosting, backups and an SSL certificate need to be taken into consideration in order to secure the website and create a safe environment for customers.
8. **Future Expansion** - Although the current website will deal with presenting products and collecting inquiries from customers, the structure should be such that in case of expansion, new elements such as online payment processing, shopping cart and user account system may be implemented easily.

7. Timeline and Milestones:

1. Research and Requirements: 1 - 2 August 2026

Identify the purpose of Angela Digital Store, its target audience, products and website requirements.

2. Website Planning: 3 - 4 August 2026

Decide on the website pages, navigation structure and content that will be included.

3. Wireframe Development: 5 August 2026:

Create low-fidelity wireframes to plan the layout and information hierarchy of each main page.

4. HTML Development: 6 - 7 August 2026:

Build the basic structure of the website using HTML, including the Home, About Us, Products, Gallery, News & Events and Contact Us pages.

5. Content and Images: 10 August 2026

Add product information, images, gallery content and other relevant website material.

8. Testing and Corrections: 12 August 2026

Check the website structure, links, images, navigation and overall content. Correct any errors identified during testing.

7. Final Review: 13 August 2026

Proofread the website and supporting documentation, check that all assignment requirements have been addressed, and prepare the final submission.

8. Submission: 14 August 2026

Submit the completed Angela Digital Store website project and accompanying assignment documentation before the required deadline.

8. Budget:

Budget Item	Estimated Cost	Frequency	Estimated Year 1 Cost
Website development	R0	Once Off	R0
Domain registration	R105	Annual	R105
Web hosting	R109/pm	Monthly	R1308
SSL certificate	R0	Annual	R0
Website maintenance	R100/pm	Monthly	R1200
Image and graphics	R0	Once off	R0
Content updates	R200	Monthly	R800
Estimated first- year total: R3413
